## Welcome to **Shridhar Fabrication Company**

### **Philosophy & Focus**

Understanding the needs of the customer in letters and in spirit and fabricating to ensure a beautiful creation that adds to the convenience and comfort. Let's not just fabricate, let's craft masterpieces that itself becomes an attraction.

To keep on acquiring most modern technology, designs, concepts and to present unique structures, always to be a cause for others to envy. To be competent to take over any size of assignment and to be so equipped to handle the assignment most professionally.

## CEO & Founder Message

**Fabrication**, which is the indivisible part of the construction, may it be commercial, residential or industrial, has assumed a new dimension.

With the advent of modern technology every aspect of life has undergone a tremendous change. The construction activity has also witnessed this, rather it has taken the change further. Now it is no more welding, or creating a tubular frame. It is more than that. Besides strength & precision, fabrication is being looked from the view of aesthetic beauty. This has been now possible, since new concepts, new designs and newer technology is at hand. Now it is expected that every frame work that accompanies a structure is unique in itself and projects itself as an artifact. **Established** in the year **1998**, **Shridhar Fabrication Company**, is a top player in the Fabricator industry, situated at Pune- Engineering hub of India. Company was established by Mr. Shridhar Gaikwad, a creative entrepreneur to undertake small fabrication assignments. Precision, quality & timely completion of the work along with

delivering beyond the promises made the firm different from others. Company has witnessed the journey of transformation since **1998** and has adopted most modern technologies, designs and machinery to ensure 100% satisfaction of the customers. Growth became the natural phenomenon.

We are committed to achieving excellence through total customer satisfaction and business growth by integrating management systems across all processes, thus maintaining leadership in the market with superior objectives in our work.

We have been working for a number of reputed & renowned business houses and construction companies all over India, like Lodha Group, Lavasa Corporation Limited, Defence Ministry, Oberoi Construction, Kalpataru Group, Runwal Group, Mumbai International Airport, Shimizu Corporation (India) Ltd. K Raheja Group, Mahindra, Godrej, etc.

We have our own set up at Narhe, Pune with 40,000 sq. ft. of workshed, & 80,000 sq.ft. at Velu, Dist Pune, third well equipped unit with modern facilities, expansion going on for additional 80,000 sq. ft. of factory shed which is at completion stage and once it is completed the facilities available with us would perhaps be the largest.

**Shridhar Fabrication Company** is not simply a fabrication facility. It is much more than that. It is a professional establishment that operates with state-of-the-art infrastructure and technical expertise. We are observing best of business policies, which makes us different from others. We are a shade different, we are a shed better.
